Title of lesson:

Food for Thought

Aim of lesson:

To understand how food effects our minds.

Lesson Objectives (up to 3 – e.g. one from each activity):

- To understand how diet culture is portrayed in the media.
- To understand what's in our food.
- To understand how food affects your mind.

Length of lesson: 60mins (extendable to 90mins)

Resources needed:

Introduction: Giant dice (or some other device to randomly generate numbers 1-6)

What's in a drink? Sugar, 5 transparent plastic cups, 5 different soft drinks/ energy drinks (plus measuring scale & sharpie for set-up)

Key Vocabulary:

Diet, Balanced diets, Health, Dehydration, Media culture, Nutrients, Vitamins

Timing (mins)	Activity	Outcome
	Slides 1 and 2	Introduction
5 mins	Introduction: discuss the learning	
	objectives.	
	Any questions?	
10 mins	Slide 3	Icebreaker
	Dice game as icebreaker	
	Each student answers one question from	
	number 1 to 6 (randomly generated)	
5 mins	Slides 4 and 5	Understanding what Diet Culture is
		and when the students might have
(15mins)	Diet Culture	experienced examples of it.
	In groups of 2 or 3 discuss What is Diet	
	Culture and when the students have	To understand the importance of
	experienced examples of it.	doing proper research about food.
	If running a 90min session feedback and	
	discuss examples from half the group.	

What's in a Drink? (slide 6): Split the class into 5 groups and give each group a bottle. Let them discuss how much sugar they think is in their drink and write a number down on a piece of paper. Have each group announce to the class their estimate. Reveal the real amount for each drink one group at a time, then show the cups of sugar to the class. Compare the original estimates to the real amount. Discussion (slide 7): What does sugar do to your body? How might it impact your everyday life? Slide 8 Food and the brain In groups of 2 or 3 discuss How does	soft drinks they enjoy. Setup: Check the back of each bottle and find how much sugar is in it, then sharpie out the number. Note the amount down for each drink. Pour that much sugar into a plastic cup for each drink, labelling each cup.
each group a bottle. Let them discuss how much sugar they think is in their drink and write a number down on a piece of paper. Have each group announce to the class their estimate.
